EXPERIENCE

UI / UX designer — ServCraft

CONTRACT / JULY 2025 to date

ServCraft is a digital job/ field-service management software company with 5000+ users aimed especially at businesses in trades (installation, repair, maintenance and security).

- **Delivered 0 - 1 experiences for over 5000 monthly users** by collaborating closely with engineering and product teams.
- **Raised monthly revenue** by evolving core product workflows to successfully raise the price of the product.
- **Increased adoption** by designing the job card wizard that guides users on how to create a job, and shows product value earlier on in their onboarding.
- **Sped up design time** by strengthening the design system and brand foundations, and documenting usage in the brand book.
- Drove the design of complex billing, shaping logic around estimates, outstanding balances, VAT and pricing changes
- Contributed to a culture of design maturity, moving work from ad-hoc UI decisions toward considered, system-driven product design.

Product designer — Credify

PART TIME / APRIL 2025

Credify helps importers ship goods from China to Kampala, pay suppliers easily, and get loans tied to their shipments—all in one place.

- **Delivered 0 - 1 online experiences to existing offline users by** spearheading the design of in-app user flows and interactions
- Led the creation of comprehensive email templates and user notification strategies, enhancing communication with customers and increasing user engagement.

Design Lead — Onafriq

FULL TIME / FEB 2022 - MARCH 2025

Onafriq enables digital payment scalability across African markets through platform convergence and interoperability.

- **Boosted the number of transactions** by increasing the capacity to 5000 transactions per batch from 1000 in the bulk payments feature.
- **Reduced support queries and an increase in repeat transactions** by delivered key UX improvements to the customer portal.
- **Enabled faster transaction monitoring and more efficient issue resolution** by reimagining the information architecture of the admin portal for a multi-currency card payment service.
- Led a multi-skilled effort to implement a full mobile app rebrand from Beyonic to Onafriq.
